Dear Hiring Manager,

I am excited to apply for the position. With over two years of experience as a **Full Stack Software Engineer** in developing dynamic and scalable applications, I have honed my expertise in backend and full-stack development, consistently delivering efficient software solutions tailored to clients needs.

During my tenure as a **Software Developer at Metapercept Technology Services**, I led the development of an enterprise backend application using **Node.js, Express.js, and MongoDB**, while seamlessly integrating external APIs and OAuth. Additionally, I built real-time chat systems with **Django, MySQL, and Next.js**, along with lightweight apps utilizing FastAPI for AWS-integrated file management. My projects required a commitment to performance, data security, and scalable design principles.

Previously at O-LINE-O Nexus, I developed a **Full-Stack E-commerce application** using the **MERN** stack, incorporating features such as **user and admin management, payment and delivery integration, and AWS** CloudWatch for efficient monitoring. My role also involved creating microservices using Django and leveraging AWS services like EC2, CloudFront, and Amplify to enhance the reliability of deployments.

My passion for modern front-end technologies led me to develop a **Next.js and Tailwind CSS**-based Admin Dashboard for Dirums Collective. Using **Redux** for seamless state management and designing custom components, I ensured an intuitive user experience. Furthermore, I extended my capabilities to mobile development, building user-friendly interfaces with React Native for streamlined product management.

I am enthusiastic about applying my skills in the MERN stack, Django, FastAPI, and cloud integration to create meaningful, high-impact solutions at your company. I am particularly drawn to your organization's innovative approach and commitment to excellence, and I believe my experience in delivering robust applications aligns with your vision.

I welcome the opportunity to discuss how my background and passion for software development can contribute to your team's success. Please feel free to reach out at your convenience to arrange a conversation. Thank you for considering my application.

Sincerely,

Shikhar Raj Mishra
